

# Acetone

Acetone is a colourless liquid used as a solvent and an antiseptic. It is one of the ketone bodies produced during ketoacidosis

## **1. Industry Uses**

---

1. Adhesives and sealant chemicals
2. Agricultural chemicals (non-pesticidal)
3. CBI
4. Fuels and fuel additives
5. Functional fluids (closed systems)
6. Intermediates
7. Ion exchange agents
8. Laboratory chemicals
9. Material is imported as a component of a complete formulated mixture which is sold for use in automotive refinishing.
10. Paint additives and coating additives not described by other categories
11. Processing aids, not otherwise listed
12. Processing aids, specific to petroleum production
13. Propellants and blowing agents
14. Solvents (for cleaning and degreasing)
15. Solvents (which become part of product formulation or mixture)
16. Surface active agents
17. Viscosity adjustors

## **Consumer Uses**

---

1. Adhesives and sealants
2. Automotive care products
3. Building/construction materials not covered elsewhere
4. CBI
5. Chemical intermediate.
6. Cleaning and furnishing care products
7. Electrical and electronic products
8. Fabric, textile, and leather products
9. Lubricants and greases
10. Metal products not covered elsewhere
11. Non-TSCA use
12. Not known or reasonably ascertainable
13. Paints and coatings
14. Personal care products
15. Plastic and rubber products not covered elsewhere
16. Toys, playground, and sporting equipment
17. Water treatment products
18. resales
