

Glycerine

Glycerine is a trihydroxy sugar alcohol that is an intermediate in carbohydrate and lipid metabolism. It is used as a solvent, emollient, pharmaceutical agent, or sweetening agent.

Industry Uses

1. Agricultural chemicals (non-pesticidal)
2. Brazing Paste component for joining carbon and stainless steel components.
3. Brazing paste component for joining carbon and stainless steel components.
4. Coatings and/or defoamers
5. Dyes
6. Finishing agents
7. Fuels and fuel additives
8. Glycerine is used for various industrial purposes. The exact application is not known after being shipped from our facility.
9. Incorporated into USP grade Glycerin
10. Intermediates
11. Lubricants and lubricant additives
12. Not known or reasonably ascertainable
13. Pigments
14. Plating agents and surface treating agents
15. Processing aids, not otherwise listed
16. Sold to re-sellers for petroleum fuel and petrochemical industry
17. Solvents (for cleaning and degreasing)
18. Solvents (which become part of product formulation or mixture)
19. Surface active agents
20. Viscosity adjustors
21. animal feed
22. emulsifier, emollient, humectant, sweetener, drug excipient, cosmetics
23. emulsifier, emollient, humectant, sweetener, drug excipient, cosmetics
24. formulation ingredient/stabilizer for finished product. typically goes into end-use cleaning products.

Consumer Uses

1. Agricultural products (non-pesticidal)
2. Anti-freeze and de-icing products
3. Arts, crafts, and hobby materials
4. Automotive care products
5. Brazing Paste Component for joining carbon and stainless steel components.
6. Building/construction materials - wood and engineered wood products
7. Building/construction materials not covered elsewhere
8. Cleaning and furnishing care products
9. DISTRIBUTION AND RESALE
10. Fabric, textile, and leather products not covered elsewhere
11. Food packaging

12. Fuels and related products
13. Furniture and furnishings not covered elsewhere
14. Ink, toner, and colorant products
15. Laundry and dishwashing products
16. Lubricants and greases
17. Metal products not covered elsewhere
18. Non-TSCA use
19. Not known or reasonably ascertainable
20. Paints and coatings
