

Toluene

Toluene, also known as toluol, is an aromatic hydrocarbon. It is a colorless, water-insoluble liquid with the smell associated with paint thinners.

Industry Uses

1. Adhesives and sealant chemicals
2. CBI
3. Corrosion inhibitors and anti-scaling agents
4. Cosmetics
5. Fuels and fuel additives
6. Functional fluids (closed systems)
7. Intermediates
8. Laboratory chemicals
9. Lubricants and lubricant additives
10. Not known or reasonably ascertainable
11. Paint additives and coating additives not described by other categories
12. Plasticizers
13. Processing aids, not otherwise listed
14. Processing aids, specific to petroleum production
15. Solvents (for cleaning and degreasing)
16. Solvents (which become part of product formulation or mixture)
17. Toner
18. customer specific blend
19. repackaging into containers for distribution

Consumer Uses

1. Adhesives and sealants
2. Automotive care products
3. CBI
4. Cleaning and furnishing care products
5. Fabric, textile, and leather products not covered elsewhere
6. Fuels and related products
7. Ink, toner, and colorant products
8. Intermediates
9. Lubricants and greases
10. Metal products
11. Paints and coatings
11. Personal care products
12. Petrochemicals
13. Plastic and rubber products not covered elsewhere
14. Wheel covering for automotive transport
15. raw material intermediate
