

## Triethylamine

TRIETHYLAMINE is a clear colorless liquid with a strong ammonia to fish-like odor. Flash point 20°F. Vapors irritate the eyes and mucous membranes. Less dense (6.1 lb / gal) than water. Vapors heavier than air.

### *Industry Uses*

---

1. Adhesives and sealant chemicals
2. Intermediates
3. Not known or reasonably ascertainable
4. Paint additives and coating additives not described by other categories
5. Photosensitive chemicals
6. Processing aids, not otherwise listed

### *Consumer Uses*

---

1. Adhesives and sealants
2. Building/construction materials not covered elsewhere
3. Formulated into Surface Active Agent
4. Fuels and related products
5. Not known or reasonably ascertainable
6. Paints and coatings
7. Personal care products
8. Photographic supplies, film, and photo chemicals
9. Plastic and rubber products not covered elsewhere
